Austen Strine

Senior Product/Catalog/Search Software Engineer, Reliable and Communicative
Parowan, Utah, United States

Summary

"Let someone else praise you, not your own mouth -
a stranger, not your own lips."

-Proverbs 27:2

"I had the privilege of hiring and working alongside Austen Strine as one of the very first developers at Lumber Marketplace, and I can confidently say he’s one of the most dedicated, hard-working, and genuinely good people I’ve had the pleasure of leading.
From day one, Austen took on massive challenges and never once backed down. Whether it was complex backend architecture, launching new features under tight deadlines, or jumping in to solve unexpected fires, Austen was always dependable and steady. He truly cares about the product, the people he works with, and the mission behind the work. He became a foundational piece of not just our engineering culture, but the overall company culture, and earned the respect of the entire team.
Beyond his technical talent, Austen is the kind of teammate every organization hopes for. He is humble, kind, collaborative, and full of integrity. He brought positivity and problem-solving to every situation he entered, and his loyalty was never contested, especially in the early, scrappy stages of our company.
Any team would be lucky to have Austen on board. I’m excited to see where he lands next, and I know he’ll continue to make a meaningful impact wherever he goes."
-Anthony Gallegos, former COO of the startup Lumber Marketplace

Here are some core principals I follow:
Everyone will not "just" (even if you tell them to)
Let's not bikeshed, we have better things to talk about
Coding is documenting - if my code doesn't self-document, I'm not coding correctly.
Keep it simple, samurai

Everything is permissible in a hotfix that works
Code isn't finished until it works without my attention or explanation

Here's some fun tidbits about me:
I love Jesus (even if you don't, it's okay, we can get along), I like the lamb vindaloo from Bombay Cafe in Cedar City, and I'm pretty good at Asuka in Tekken 7

Experience

Express Employment Professionals - Cedar City, UT
Door Builder, Timberline Cabinets
July 2026 - August 2026 (2 months)
Cedar City, Utah, United States

Learned how to cut, rip, drill, band, assemble, CNC, clean, and palletize doors.

Developed color matching skills and demonstrated high levels of detail orientation and problem solving.

New Era Management, LLC (Burger King)
Team Member
August 2025 - May 2026 (10 months)
Cedar City, Utah, United States

Got C-suite level commendation for gold star customer service at the drive through window.

Mastered drive through, front counter, cash handling, fryers, fryer maintenance, quality control, expediting, multitasking.

Entered beginning stages of training for management.

Lumber Marketplace
Full-stack Developer
January 2024 - June 2025 (1 year 6 months)
Colombia, Tennessee, United States

Startup - High pressure, high workload, extreme agility and productivity needed.
Built a custom, industry specific regex synthesis engine and regex library for raw/dirty textual data processing, inventory upload, and search keyword harvesting.

Built a suite of bash scripts for convenient postgres data backups, debugging with live data, and admin tasks, including an API for the scripts to interact with.

Completely rebuilt frontend and backend "Product" feature that was poorly designed and implemented by a temp worker. (They were literally naming variables a, b, c etc., it was a nightmare to rebuild.)

Built generators into prisma that synthesized a full suite of classes and helper constants for every model defined in the prisma schema, with complete class-validator, class-transformer, and swagger integration, to reduce nearly all of the implementation and maintenance cost of DTOs, entities, and other database related model files.

Also built a suite of helper functions that make coercing DTO data into prisma clauses both painless and seamless.

Spent a lot of time working out problems introduced by generations of project direction changes to enable agile development for my coworkers.

Extremely responsive hotfixes for site-breaking errors.

I worked most of the time without a CTO, in direct collaboration with co-workers, marketing/salespeople, and reporting directly to the owners. I acted as an unofficial CTO - keeping the team together, excited about the project, optimistic, and focused on both immediate and long-term goals.

In this position, I showed unusual adaptability, fast skill broadening, cement-strength team retention skills, and powerful team force multiplication. Almost every project I invested time into improved architecture in a way that made programming 5-10x easier and faster for my coworkers.

GO Green Enterprises

Senior Application Developer

November 2018 - November 2023 (5 years 1 month)

South West Utah

Senior developer coordinating with coworkers to build, maintain, design, and update web applications (PHP/Laravel, JavaScript, CSS, HTML, jQuery), including but not limited to adamsandco.net, plumbersstock.com, and swplumbing.com. Sole/lead developer for adamsandco.net. Sole/lead

developer for in-house iOS order processing app (Swift, SQLite). Sole/lead developer for both in-house and 3rd-party search solutions (Elasticsearch, Unbxd). Junior server admin (Apache/Ubuntu, Bash, crontab, artisan). Junior database admin (MongoDB, aggregation pipeline, MySQL). Repository pull-request coordinator for US office (BitBucket, GitKraken, git). Regularly involved in training junior devs (voluntarily, I enjoy it).
Other skills developed during this period: Dart/Flutter, TypeScript, Node.js, React.js

In this position, I demonstrated an ability to work in extremely technologically hostile environments - deprecated code, systems that are no longer maintained, 15 year old functions that support the entire company but that nobody looked at since they were written, that's the MO I'm accustomed to working within. Much tougher than I seem, I can handle a crisis like almost nobody else.

The most important skills I picked up from this job were deep teamwork and leadership skills in an environment with broad diversity of thought and approach to programming.

Anderson Merchandisers
Territory Sales Lead
July 2018 - November 2018 (5 months)
South West Utah

Work with Walmart management in two locations to facilitate and participate in product placement, resets, and pulls for Anderson clients, including associated administrative tasks(start/end time, personnel required, logistics, etc.) Adjust to understaffed working conditions (about 32 hours/week short) by developing sharp delegation, time management, decision making, and prioritization skills to meet the challenge, and to make deadlines. Communicate with and train the associates on my team to ensure they are meeting their goals and deadlines. Sell product features, endcaps, pallets, corragate, and other displays to Walmart management for Anderson clients.

Vivint Smart Home
Smart Secure Specialist
October 2017 - December 2017 (3 months)
Cedar City, UT

Responsible for inbound tech support, assisting customers with smart devices and security systems including their installation and troubleshooting, updating

firmware, reporting bugs, and general assistance over the phone, responsible for assisting customers with billing concerns, applying credits for mishaps, etc. Trained on 2GIG panels & associated equipment, and Vivint proprietary panels/equipment.

Infowest Inc
Tech Support
March 2016 - September 2017 (1 year 7 months)
Cedar City, Utah

InfoWest is a Wireless ISP that works with Ubiquity brand equipment. I'm familiar with troubleshooting both customer units and the access points on our towers, as well as the basic concepts behind their function. I started at basic troubleshooting on the customer level over the phone, multi-brand router set-up, dealing with wi-fi interference, bypassing routers, setting up PPPoE, and more on both Apple and PC devices. Also became familiar with setting up e-mail on POP and IMAP servers for most any device or third party client. Can do most basic networking tasks. Also gained limited experience with Cisco VoIP ATA troubleshooting and set-up. Gained additional insights into computer repair and cleaning methods and tools. Some limited experience with Mimosa brand equipment. Created a troubleshooting flow program for the company, reached beta testing and basic functionality. That program, named WISP-T, can be found on my GitHub profile.

Utah Shakespeare Festival
House Management
June 2015 - November 2015 (6 months)
Cedar City, Utah

Responsible for all guest experiences for assigned shows. Coordinated with volunteer ushers for seating of guests and oversaw any ticket/seating issues. Helped disabled guests with courtesy wheelchairs etc. Provided guest conveniences such as Assistive listening devices, blankets, cushions. Ensured that any passers-by stayed outside of the restricted areas, occasionally had to chase folks down.

Gateway Management Group
Sales Representative
October 2013 - June 2014 (9 months)
Chico, CA

Trained in sales, customer service, and basic public relations. Achieved Sales quota for leadership, and passed leadership exam. Ranked #1 in the nation

for installs on the weekly national printout. Ranked within the top 10 on the national printouts multiple times. Trained junior sales reps and built my team, most of which were on-track for leadership at the time of my departure.

Gap Inc./Old Navy
Salesman, Casheir
October 2012 - January 2013 (4 months)
Chico, California, United States

Responsible for re-stocking merchandise, service blitz' on the sales floor, quick check outs/casheir duties, maintaining high conversion rates/units per transaction/money per transaction, serving the customer with a proactive attitude, selling Old Navy Cards, store recovery, and developing customer relationships.

Chartwells (Higher Education Division)
Dishwasher/Floor man
2012 - 2012 (less than a year)

Duties included keeping dish area clear, sweeping, mopping, emptying trash, minor dishwasher maintenance. Responsible for closing down the cafeteria at night. Worked on call and with a regular schedule.

Education

Southwest Applied Technology College (Cedar City, Utah)
Technical Certificate, Computer Science · (2016 - 2018)

Southern Utah University
None, Theatre/Theater · (2015 - 2016)

Simpson University
None, Music Theory and Composition · (2009 - 2012)
